

Segami Corporation is a privately-owned medical imaging software vendor engaged in the development and marketing of best-in-class Nuclear Medicine/Molecular Imaging software solutions for the Diagnostic Imaging market since 1995. We specialize in customized and advanced clinical applications to help diagnose body functioning at the molecular and cellular level. Our software includes registration/fusion tools to combine other diagnostic procedures such as x-rays, CT and MRI that provide structural information. A sample list of clinical applications and tools available in Oasis, Segami’s flagship product, is listed below:

General Nuclear Medicine

- Bones, Gastric, GI Bleed
- Hepatobiliary, Renal
- DMSA, sentinel node, thyroid, para-thyroid

Processing Tools

- Reconstruction
- Multi-modality registration
- Shunt, reflex analysis, volume subtraction, region ratio

Cardiology

- FirstPass, Muga, CardioGam
- QPS/QGS from Cedars-Sinai
- Corridor4DM from Invia
- Emory Toolbox from Syntermed

Neurology

- NeuroGam
- DaTScan (for Parkinson)
- SISCO (for Epilepsy)

Oncology/Multi-Modality

- PET-CT, PET-MR fusion apps
- SPECT-CT, SPECT-MR apps
- OSEM3D reconstruction

Others

- Pulmonary, Lung applications
- Breast Imaging apps for BSGI/MBI
- Veterinary Imaging (e.g., equine)

Universal Connectivity

Our software can be interfaced with all gamma cameras and scanners serving the Nuclear Medicine and Radiology markets. We have developed different customized interfaces to seamlessly integrate with gamma cameras, archiving systems (PACS) and information systems (HIS/RIS) such that the workflow for the user is transparent and easy. We strive to make our software available to the broadest market, regardless of original equipment make and model.

Our Strength

- Strongly rooted in molecular imaging, Oasis is a completely vendor-neutral solution
- Oasis helps to optimize workflow by providing uniform processing for all technologist and standard viewing for all users, radiologists & physicians, across the enterprise
- All clinical applications are developed in collaboration with leading institutions
- Segami employs clinical and technical expertise at all levels of the organization
- Culture of customer centric innovation with a large customer base
